TECHNOLOGY OF INVENTION

S I R:

In response to the Notice dated April 5, 2002, (copy attached) Applicant herewith submits a substitute specification incorporating all of the handwritten changes which were included in the application as originally filed. A marked-up copy indicating the changes by bracketing and underlining is also enclosed, however, these changes are *not* amendments to the specification, since they were initialed and dated by the inventor on the same date as the Declaration was assigned. The changes are therefore considered to be included in the original content of the specification. The substitute specification does not contain any new matter.

Submitted by,

Steven H. Noll
